

NatureDynamics Zigbee Gateway

- Zigbee mesh gateway for secure, reliable lighting control
- Lighting systems of up to 200 luminaires can be controlled with a single gateway
- Software and Light recipe hosted on the gateway controls
 - photo period of each day
 - light intensity throughout the day
 - light color spectrum throughout the day
- NatureDynamics system provides the optimal lighting for the performance and well-being of your animals.

Invest in the quality of your lighting system

The NatureDynamics Zigbee Gateway creates a strong mesh network to communicate with the NatureDynamics luminaires. The gateway contains all of the intelligence necessary to control the luminaires characteristics to provide the optimal illumination for the performance and well being of the animals at each growth stage. Each gateway and software are capable of controlling up to 200 luminaires that can be divided into multiple zones and controlled independently. The gateway software utilizes a light recipe that controls the daily hours of illumination, the light intensity, and color spectrum throughout each day.
